

**CONNECTICUT  
STATE TREASURER'S  
SHORT-TERM INVESTMENT FUND**

**QUARTERLY REPORT**

**QUARTER ENDING SEPTEMBER 30, 2008**

**DENISE L. NAPIER  
STATE TREASURER**

## MESSAGE FROM THE TREASURER

### Dear Investor:

During the quarter ending September 30, 2008, the Connecticut Short-Term Investment Fund (STIF) earned an average annualized yield of 2.30 percent, which was 3 basis points below its iMoneyNet benchmark\*. Consistent with the past few quarters, the lower return resulted from our more conservative investment strategy in response to the turbulent credit markets. We continue to maintain a high level of liquidity and a short average portfolio maturity, and have severely restricted investments in corporate securities. STIF currently holds more than \$2.5 billion, or 61 percent of fund assets, in overnight investments or investments that are available on a same-day basis. Our weighted average maturity is 18 days.

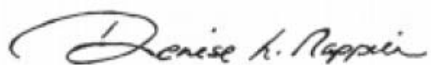

As we have reported to you a number of times, STIF's Cheyne Finance notes were restructured effective July 23, 2008. We converted the Cheyne position into unrated Gryphon Funding notes that give us proportionate ownership of the securities that were underlying the Cheyne notes. This report values the Gryphon notes at a level that represents a recovery value of approximately 76 percent of the original \$100 million Cheyne investment. Cash distributions beginning in April 2008 have totaled \$28.5 million. STIF's reserves allowed us to cover the value adjustment without affecting STIF's \$1 per share net asset value, or the loss of principal to any STIF investor.

We have transferred \$24 million of the reserves to cover the difference between the expected recovery value and the original principal amount. As of December 15, 2008, STIF's available reserves totaled \$31.4 million, or 0.8 percent of fund assets. The reserves are being rebuilt daily at the annual rate of 10 basis points until they reach one percent of total assets.

We are pleased to report that Standard & Poor's formally reaffirmed STIF's AAAm credit rating – the highest available for money market funds and investment pools – on November 10, 2008. During these unusual times, S&P monitors our portfolio daily to ensure it meets the highest standards for security and liquidity.

As always, we appreciate your confidence and pledge to make every effort to vigilantly protect the interests of all of our investors.

**Sincerely,**

**Denise L. Nappier**  
**Treasurer, State of Connecticut**

**December 16, 2008**

# PERFORMANCE REPORT

The information contained within the Performance Report for the Short-Term Investment Fund (STIF), includes an update on the economy, a review of the direction of short-term interest rates, and a recap of the strategic and asset allocation position of STIF.

## ECONOMIC OUTLOOK

The chart below gives an assessment of economic growth, current levels of inflation, and the employment situation. All told, STIF is operating in an environment of negative economic growth and a deteriorating job market.

### ECONOMIC SNAPSHOT

	Recent Results	Future Expectations
<b>Growth</b>	The U.S. economy declined at an annual rate of -0.5 percent during the first quarter of Fiscal Year 2009.	The Bloomberg December 2008 survey of U.S. economic forecasts projects that the U.S. economy will decline at a rate of - 4.3 percent for the second quarter of FY09. For all of CY08, the economy is projected to grow 1.2 percent.
<b>Inflation</b>	Major Inflation Indices – Year-over-Year as of December 16, 2008  <div style="margin-left: 40px;">             Core PCE                      2.1 percent              Core CPI                        2.0 percent              Core PPI                        4.2 percent           </div>	Core inflation indicators will likely decline significantly below 0.7 percent for all of CY09. Economists expect inflation to average 1.5 percent during the year.
<b>Employment</b>	In November, non-farm payrolls were down 533,000 and the unemployment rate increased to 6.7 percent from 6.5 percent in October.	Economists expect the unemployment rate to rise well above 7.0 percent in CY09 averaging 7.4 percent for the year.

## SHORT-TERM INTEREST RATE OUTLOOK

Since July 1, 2008, the federal funds target rate has been cut from 2.0 percent to a range of 0.00 to 0.25 percent.

At both the August 5th and September 16th FOMC meetings, the committee continued to emphasize the fact that “tight credit conditions, the on-going housing contraction, and elevated energy prices are likely to weigh on economic growth over the next few quarters.” Further, at the September meeting, the committee expected economic growth to deteriorate but, “the substantial easing of monetary policy, combined with ongoing measures to foster market liquidity, should help to promote moderate economic growth.”

At an inter-meeting held on October 8th, the FOMC, citing a weakening economy and declining inflation, lowered the fed funds target rate by 50 basis points to 1.5 percent.

At its regularly scheduled meeting on October 29th, the FOMC lowered the fed funds target rate by another 50 basis points to 1.0 percent. The FOMC stated that the “pace of economic activity appears to have slowed markedly, owing importantly to a decline in consumer expenditures.” Further, the FOMC added that “the intensification of market turmoil is likely to exert additional restraint on spending, partly by further reducing the ability of households and businesses to obtain credit.”

On December 16, 2008, citing the fact that “the outlook for economic activity has weakened further, labor market conditions have deteriorated and the available data indicate that consumer spending, business investment, and industrial production have declined” the FOMC established a range for the fed funds target rate of 0.00 to 0.25 percent.

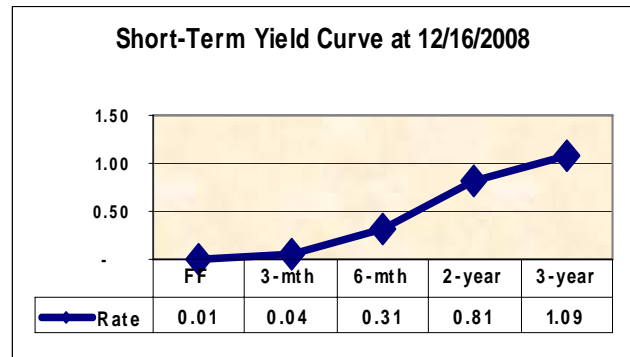

## PERFORMANCE REPORT

The chart below shows the FOMC meeting dates for the period January 2008 through January 2009 and the actual or projected level of the federal funds target rate throughout this time horizon.

FOMC Meeting Dates	Federal Funds Target Rate Level	
	Actual	Future Projection (a)
January 22, 2008	3.50%	
January 30, 2008	3.00%	
March 18, 2008	2.25%	
April 30, 2008	2.00%	
June 25, 2008	2.00%	
August 5, 2008	2.00%	
September 16, 2008	2.00%	
October 8, 2008	1.50%	
October 29, 2008	1.00%	
December 16, 2008	0.00 to 0.25%	
January 28, 2009		0.18%

a) Federal Funds and Eurodollar futures data, which project the implied future federal funds rate as of December 16, 2008.

The current yield curve is upward sloping. The actual fed funds rate is 1.0 basis point, which is at the lower end of the target rate range of 0.00 to 0.25 percent. (See chart at right.)

### SHORT-TERM INVESTMENT FUND PERFORMANCE

Due to the continuing unsettled credit markets, we have made on-going adjustments to STIF's investment strategy, including shortening maturities, increasing liquidity, increasing exposure to U.S. Treasury and agency securities, and eliminating exposure to asset-backed commercial paper programs.

At the end of the first quarter of FY09, STIF's weighted-average maturity was 30 days, and liquidity, represented by overnight investments and investments available on a same-day basis, totaled \$3.3 billion, or 60 percent of assets.

Bank deposit instruments accounted for 33.6 percent of STIF's assets, followed by U.S. agency securities at 25.2 percent, and repurchase agreements collateralized by U.S. agency securities at 21.2 percent. During the quarter, the daily annualized yield fluctuated from 1.97 percent to 2.41 percent and ended at 2.13 percent. The average annualized yield for the quarter amounted to 2.30 percent.

As discussed in the Treasurer's letter, this report reflects the restructuring of our Cheyne Finance notes into Gryphon Funding notes and the transfer of \$24 million of reserves to cover the value adjustment. We will continue to maintain a more cautious strategy until markets become more stable.

We, of course, will adjust our investment decisions as market conditions change.

*Performance Report reflects the views of the management of the Office of the State Treasurer's Short-Term Investment Fund.*

<p>(b) On November 19, 2008, Citibank N.A. purchased the assets of the SIVs and agreed to ensure the payment of the senior debt. On November 21, 2008 Standard &amp; Poor's lowered the credit rating on the \$150 million in securities remaining in the portfolio to AA from AAA, which reflects the credit rating of Citibank N.A.</p> <p>(c) The Cheyne Finance notes were restructured effective July 23, 2008. We converted our Cheyne position to unrated Gryphon Funding pass-through notes which gives STIF a pro rata share, with other senior creditors, of ownership of the portfolio of securities underlying the Cheyne notes. Cash distributions through December 2008 have totaled \$28.5 million. We have transferred \$24 million of the reserves to cover the value adjustment.</p>

(d) As of September 30, 2008, STIF owned \$250 million in The Reserve's U.S. Government money market mutual fund. Effective September 17, 2008, with the permission of the U.S. Securities and Exchange Commission, the fund suspended redemptions due to a large volume of redemption requests resulting from a reduction in value of another Reserve money fund. The U.S. Government Fund's \$1 per share NAV has not been affected by these events. Furthermore, the U. S. Government Fund has been accepted into the U. S. Treasury's Temporary Guarantee Program for Money Market Funds which provides a guarantee of \$1.00 per share to participating money market fund shareholders. Approximately 40 percent of our then \$250 million position was paid on November 14, 2008, and the remainder is scheduled to be paid in January 2009.
